

OPEN THE POSSIBILITIES

Artist's Rendering

## Two views. **One dynamic space.**

Create flexible, dynamic spaces that open or close with the push of a button, with Vertically Folding Walls from Vista Air™, a division of Construction Specialties.

Closed, Vista Air provides a thermal and moisture barrier that promotes energy savings, occupant comfort and protection from the elements. Open, it offers an unparalleled occupant experience with uninhibited airflow and unobstructed vistas.

Either way, you get a thin, clean design with various mounting options, glass colors and cladding materials to harmonize seamlessly with adjacent features. And, thanks to its innovative bi-fold wall technology and lean aluminum construction, Vista Air Vertically Folding Walls are lighter than other open air wall solutions and easier and more affordable to install.

## Features & Benefits

- Effectively creates two spaces in one
- Multiple cladding options, including metal, wood and glass
- Multiple glass options
- Rizon Lift System simplifies installation & reduces maintenance
- Rizon Lift System is lighter and easier to install than counterweight-driven systems
- Furnished and installed less expensively than other products in its class
- Engineers available to assist with design and installation

## Rizon™ Lift System

Vista Air Vertically Folding Walls simplify installation and reduce maintenance by utilizing the Rizon Lift System instead of counterweights, tension springs, straps, hydraulics or pulleys as found in other systems. This innovative system utilizes advanced sensors to ensure safe operation.

With Vista Air, new design possibilities are just beyond the horizon. With the low-profile, ultra-quiet Rizon Lift System, you can rest assured that your pursuit of a sleek, open aesthetic will be free of obstructions. Easy to install, reliable and durable, the Rizon Lift System makes working with Vista Air Vertically Folding Walls a breeze.

## Go with the Flow. Design Sustainably.

Our commitment is to not only to create products that contribute toward lowering the environmental impact of buildings, but also to conduct business in a manner that has no negative impact on the environment. Vista Air Vertically Folding Walls are manufactured with recycled aluminum while also promoting energy efficiency through their dynamic functionality.

## Comfortably Compliant

The design of Vista Air Vertically Folding Walls accounts for safety and governmental codes. VAVFW products are manufactured to be in compliance with UL 325 safety standards.
